About

Lorem ipsum dolor sit amet consectetur adipisicing elit. Deleniti tempora quisquam numquam beatae eligendi. Quisquam quae quidem quis excepturi ipsum!
Lorem ipsum dolor sit amet, consectetur adipisicing elit. Accusamus dignissimos praesentium qui. Soluta, tempora placeat.

book finder

</> get resource

A user-friendly Book Finder application designed to help users search for books based on title or author. The site pulls data from a public API,

Book finder   Log-in Regist

Start by looking for your favorite book!

Search!

| HTML, CSS and JavaScript | Flask | SQlite | Google's book API |

Server-client game

</> get resource

a multi-threaded Java TCP game, where a player connects to the server, and plays 5 multi-choice questions using a command line argument. the game requires two players to start.

| JAVA | BCrypt | SQlite |

Chat App

currently developing

allows users to communicate in real-time through a graphical user interface (GUI) built with JavaFX. The application follows a client-server architecture, where the server manages multiple client connections and facilitates message exchange between users.
